

## 2011 Census: Key Statistics for Birmingham and its constituent areas

### KS102 Age structure

This table is part of the 'Key Statistics for local authorities and local areas in England and Wales', the first release of the key statistics that add to the population estimates from the 2011 Census of Population for England and Wales that were published in July 2012.

This workbook provides Key Statistics for Birmingham Districts, wards and other selected areas wards as at census day, 27 March 2011.

*Wards are based on 'Best Fit' approximations calculated by the Office for National Statistics.*

*Results for Birmingham wards are based on allocation of whole Census Output Areas.*

*Data for any Census Output Area that is split by a new ward boundary are allocated to the ward that contains the greatest share of its population.*

#### Notes and Definitions

1. The main population base for outputs from the 2011 Census is the usual resident population as at census day (27 March 2011). Although the population base for enumeration included non-UK short-term residents, these are not included in the main outputs from the 2011 Census, but are analysed separately. All outputs, unless specified, are produced using only usual residents of the UK. For 2011 Census purposes, a usual resident of the UK is anyone who, on census day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.
2. Further information about the census estimates, including details about the methodology used, information about data quality and a range of supporting information are available on the ONS website at <http://www.ons.gov.uk/census>

## **Definitions**

### **Age**

Age is derived from the date of birth question and is a person's age at their last birthday. Dates of birth that imply an age over 115 are treated as invalid and the person's age is imputed. Infants less than one year old are classified as 0 years of age.

### **Mean age**

Mean age is calculated by dividing the sum of each person's age by the number of people. Ages are the age at last birthday (in whole years).

### **Median age**

The median age is the middle value when all the ages are arranged in order from youngest to oldest. Ages used are the age at last birthday (in whole years).
